All Female Build

The Chevy Montage All Female Build is all about highlighting the women of the automotive world, creating learning opportunities for women interested in exploring the trades, and ultimately attracting new people to our industry! Throughout the year women from all over the country will be building a '57 Chevy Pick Up powered by a BMW S62 engine! The build will be unveiled at SEMA 2017.

We need your help! Visit our Indiegogo crowdfunding campaign and help us offer even more great workshops and more opportunities for women to be involved and spread the word of how awesome our industry is! Plus, we've got some pretty sweet swag in return for your generous donation.
